

case study

DLA

Customer Background:

The Defense Logistics Agency is the Department of Defense's largest logistics combat support agency, providing worldwide logistics support in both peacetime and wartime to the military services as well as several civilian agencies and foreign countries.

Customer Requirement:

The client required ERP support for their ongoing efforts for modernization, for specific procurements under the USA's BRAC responsibilities.

The NVR solution:

The NVR assisted the agency in planning the overall modernization roadmap under the EBS Integration and Sustainment contract. NVR also:

- Provided application support for the agency's existing COTS enterprise-ware.
- Configured Master Data, Order Management, payment modules and Military Inter-department Purchase Requisition modules
- Migrated data from legacy applications to SAP, designed a payroll interface with end-to-end encryption and developed new business objects in SAP to provide unprecedented, new functionalities for the end users

Business Benefits:

The solution offered by NVR was extremely helpful in creating a supportive and trouble-free system where:

- The agency was able to meet its expanded scope of responsibilities in a small timeframe
- The migration from the legacy COTS system to SAP was effortless, leading to cost savings

Technologies:

SAP, EDI, ALE, Desktop Office Integration, Workbench implementation methodology
