

NVR Innovation Accelerator

Maximizing innovation while minimizing the burden

How We Accelerate Your Innovation

In the world of federal IT, innovation is a contractual requirement. Many programs lack the internal bandwidth and dedicated resources to deliver compelling innovations. NVR's Innovation Accelerator offers a structured, expert-led program to help

25+

Years of Federal IT Experience

35+

Impactful Innovations & Prototypes Delivered

75+

Led by panel of 3 experts with more than 75 years of combined Fed IT Delivery & Tech Innovation Experience

Proven Innovation in Action

Cloud & Platform Modernization Innovations

- Multi-Cloud Operations Platform Prototype
- Cross-Platform Mobile App with MS Dynamics 365 CRM
- Copilot - SharePoint Integration Extension Demo

Healthcare Technology

- Organ Transplant Patient Waitlist Optimization Prototype
- Patient Outcome Predictive Tool Proof of Concept

Artificial Intelligence & Machine Learning

- AI-Driven Testing for intelligent test case generation, predictive defect identification, autonomous and self-healing testing and generating large user loads for Performance & Load testing
- Vision AI Demos for Image/Report Analysis: Embryo grading platform, hair segmentation and strand analysis tool, skin analysis platform, and guided web selfie tool
- Vision AI Demos for Video Analysis: Traffic monitoring and compliance, AI-based security and surveillance, AI-based waste management and Can label inspections
- Intelligent Document Processing Demo: Compatible with various document types including handwritten notes and multi-language capabilities

Our Methodology

Phase 1: Ideation & Strategy Sessions. NVR's Innovation Methodology Runbook to generate pipeline of ideas

Phase 2: Rapid Prototyping & Development

Phase 3: Structured Roadmaps & Plans. Our expertise in federal IT ensures every innovation is aligned with program mission, technology stack, contractual requirements, and strategic goals

Our Value Addition

Expert-Led Innovation: Our team of experts brings academic and practical knowledge to deliver cutting-edge yet grounded ideas

Rapid Prototyping & Demos: We develop quick proofs of concept and live demos to present tangible, working solutions to clients

Tailored to Your Program: We align innovation efforts with your program's specific mission, tech stack, and long-term goals

Cost Effective: Our services are designed to be a flexible, on-demand solution that fits within your program's budget and operational structure
